

Dogukan Celik

Antalya, Turkey | dogukancelik2@proton.me |  Blog |  dogukancelik |  dcelik81

Summary

Highly motivated and versatile individual with a long-standing interest and involvement in software development since the age of 11. This early start provided a strong foundation through explorations in areas such as web development/design, Arduino programming, and ActionScript 3.0 for Flash game development. Currently focused on frontend development, eager to leverage a diverse technical background and a deep-rooted passion for creating impactful digital experiences.

Experience

Frontend Developer, Teknodev – Antalya, Turkey July 2024 – January 2025

- Contributed Vals Diamond using Next.js, Typescript, CSS & SCSS.
- Created a responsive, pixel-perfect navigation bar according to figma design.
- Implemented language switching feature for the project using NoSQL database and api endpoints.
- Contributed Blinkpage with implementing responsive, custom, high performance & reusable components using React.js, Node.js, Typescript, CSS & SCSS.
- Contributed to the backend of the project and implemented subscription based payment feature and tracking system with Stripe.

Full-stack Web Developer, Exosistem – Antalya, Turkey May 2023 – July 2024

- Developed an automated, responsive, restaurant & cafe management system (including self-order on table, order status, cashier feature, stock control & basic ERP actions) using ReactJS, NodeJS & Bootstrap.
- Developed a fully functional ERP software for a local construction company in Antalya using React, TailwindCSS, Node.js & MongoDB.

Full-stack Web Developer, Loyalapp – Antalya, Turkey March 2023 – Dec 2023

- Developed an MVP for an Ideathon which is TÜSİAD Bu Gençlikte İş Var!, in Ankara, Turkey.
- Developed a prototype android application for Google Solution Challenge 2023 in just 2 days with Flutter & Firebase which I have never worked with before.
